Lesson 1 Lead-in

Look at the following graph of Maslow's hierarchy of needs and with a partner, discuss the following questions.

Lesson 1 Lead-in

Look at the following graph of Maslow's hierarchy of needs and with a partner, discuss the following questions.

1. How many levels are there in Maslow's hierarchy of needs theory? And what are these levels?

Five levels. Physiological, Safety and Security, Love and Belong, Self-esteem and Self-Actualization needs.

2. What is the basic need in Maslow's hierarchy of needs theory? Can you come up with some examples of each need?

Physiological needs. Physiological needs involve air, food, water, warmth, sleep, etc; Security and safety needs involve shelter, law&order, employment, health, stability, etc; Love and belonging involve family, friends, intimacy, relationship; Self-Esteem involves self-confidence, achievement, recognition, status, respect, etc; Self-actualization involves realizing one's personal potential, self-fulfillment, personal growth, peak experiences, etc.

Lesson 1 Lead-in

Look at the following graph of Maslow's hierarchy of needs and with a partner, discuss the following questions.

3. What is the relationship between each two adjacent levels in the pyramid?

Maslow proposed that when the lowest level is achieved, it motivates an individual to fulfill the next level and so on until the individual eventually reaches the most complex need at the top of the pyramid.

Lesson 1

Reading

Text A

Challenges and Considerations for Housing in the Future (Extract)

Para. 1 Home dwelling structures are as diverse as cultures. Most of this diversity depends upon the region of the world in which an individual resides, the financial condition, age, class, occupation, and family dynamics. The concept of housing as a basic need is supported by Maslow's hierarchy of needs theory (Maslow, 1943). Maslow formulated this psychological theory to describe five human needs which follow a hierarchical pattern. The five needs are depicted as a pyramid. The basic needs such as housing are on the lowest level of the pyramid. Maslow proposed that when one need is achieved, it motivates an individual to fulfill the next level and so on until the individual eventually reaches the most complex need at the top of the pyramid.

Para. 2 Physiological needs, which form the base or lowest level of the pyramid, are basic requirements such as food, water, sleep, and homeostasis. Once these needs are met, the individual then moves to safety and security including health and wellness. The next level is the need for love and belonging. This need can be achieved through friendships, social groups, family, and romantic relationships. Once the need for love and belonging has been met, the desire for self-esteem is next.

Lesson 1

Reading

A feeling of confidence in one's abilities, including academic, personal, and professional accomplishments, reflects this need. The pinnacle of the needs hierarchy is self-actualization, which is a feeling of accomplishment. When a person has reached self-actualization, what others think is less important to the individual. The need for external approval has been replaced with the fulfillment of personal goals. In summary, the need for shelter is a vital requirement for survival that impacts human function at the optimal level. For Maslow, this need is foundational to progress to the higher needs (Maslow, 1954). See Figure 1.

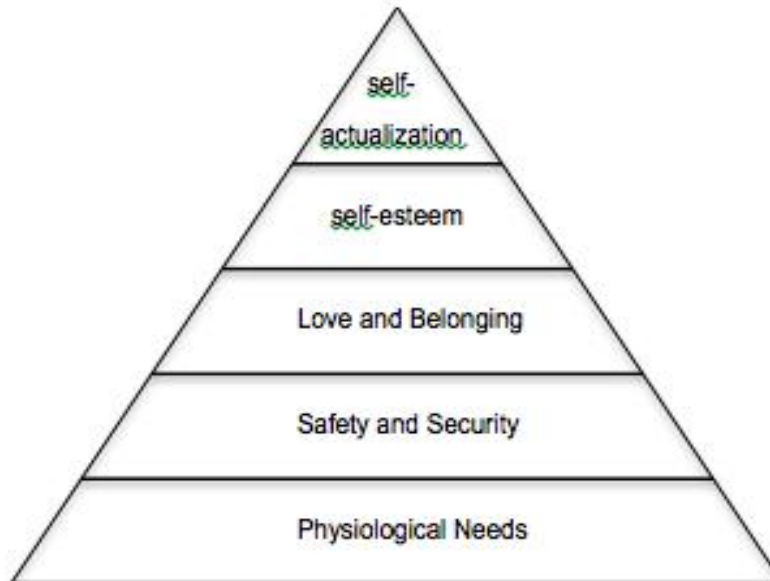

Figure1 Maslow's hierarchy of needs

Lesson 1

Reading

Para. 3 Similarly, Max-Neef (1991) discussed the human need from a community perspective. In his philosophy, protection needs to be made manifest through the living space, social environment, and dwelling place. Viewing these two perspectives simultaneously illustrates the interconnection that is foundational for human residence. At present, over half of the world's population, which amounts to 3.5 billion people, lives in urban cities. This is expected to increase to 5 billion people by 2030. Also, 883 million people currently reside in slums which are mostly located in Eastern and Southeastern Asia (United Nations, 2018a). To obtain quality and affordable housing is a daunting task for the world's population. However, given innovative solutions and principles of sustainability, this is the appropriate time to consider the role of housing in the future.

United Nations and Sustainable Goals

Para. 4 Looking to the future, the United Nations (UN) has developed 17 sustainable development goals for the year 2030. See Figure 2. The 11th goal, Sustainable Cities and Communities, has the objective of “making cities and human settlements inclusive, safe, resilient, and sustainable” (United Nations, 2018b). While urban areas provide cultural opportunities, market development, productivity, societal advances, and more, several challenges exist in the areas of maintenance of resources and supportive infrastructure. Housing

Lesson 1

Reading

shortages, funding for essential services, and congestion are paramount. The United Nations (2018b) target to “ensure access for all to adequate, safe and affordable housing and basic services and upgrade slums” is imperative. What solutions exist to make this happen?

Figure 2 Sustainable development goals.

Lesson 1

Reading

Housing Options

Para. 5 As consideration is given for housing in the future, a choice currently used and will continue to have merit for the future is homesharing. Homeshare International, a network of global professionals who direct homeshare programs, defines homesharing as “...enabling two unrelated people to share a home and their lives for their mutual benefit.” (2018) Homesharing benefits elderly individuals, homeless adolescents, single parents needing help with childcare, university students desiring reasonable lodging, those with disabilities, and career professional individuals who are challenged by the cost of housing. (Homeshare International, 2018; Liedel, 2011; St. Ambrose Housing Aid Center, 2018)

Para. 6 The concept of homesharing provides a win-win solution as individuals are carefully “matched” by an agency. An example of homesharing in France includes senior citizens and university students engaging in “intergenerational living” (Homeshare International, 2018). The project entitled “ensemble2générations” has paired more than 6,000 students with older people in the country (ensemble2générations, 2018). One such pair involved a student from Argentina sharing a home with a 76-year-old Parisian. An organization in Baltimore, Maryland which is associated with Homeshare International is St. Ambrose Home-sharing, a program of St. Ambrose Housing Aid Center. St. Ambrose matches a homeowner with available room in their home with someone looking for an

Lesson 1

Reading

affordable room to rent. Since its inception in 1988, the program continues to have a very high success rate and has matched over 3,000 individuals during this time period according to Karen Heyward-West, Homeshare Director. The individuals who use this service include older adults who desire to age in place, widows on a fixed income, those who are not able to purchase home, single parents with children under age 12, and children who are homeless and in foster care.

Para. 7 Related to this idea is cohousing in which separate homes or apartments are located around a shared outdoor space. Members of the group share agreed-upon tasks, which contribute to property upkeep thus reducing total living costs (Meyer, 2018). This idea is especially helpful for older adults as many desire to age in place. Such innovative housing alternatives are viable options for meeting physical and emotional needs. In the United States, a similar model has been developed for young singles known as Ollie. Ollie (which represents “all inclusive”) provides a micro studio apartment with the amenities found in a hotel (Scott, 2018). Conveniences include furnishings, housekeeping, linen service, gym, Internet service, and a person who serves as community manager to organize social activities. This housing choice creates a positive “community” and consistent interaction among residents is established.

Lesson 1

Reading

Conclusions

Para. 8 The future of housing warrants attention as global population increases, urban cities become more populated, and housing affordability challenges reside in both developed and developing societies. A number of innovative alternatives have been reviewed. Other alternatives exist which might support sustainability and contribute to health.

(1051 words)

Lesson 1 Comprehension Check

I. Skim the text and identify the paragraphs whose main ideas the following statements conclude.

- Para.6** 1. The project of pairing students who looked for rooms with older people proved successful.
- Para.5** 2. Homesharing will continue in the future for the merits it provides.
- Para.1** 3. Although house structures are different from culture to culture, house is a basic need indicated in Maslow's hierarchy of needs theory.
- Para.7** 4. Another option for housing is shared "community" where people share tasks of keeping up the property.
- Para.2** 5. Housing is the basic need for survival according to Maslow's needs theory.
- Para.4** 6. The United Nations (UN) has developed development goals for housing in the future.
- Para.3** 7. It is time to consider the role of housing in the future.

Lesson 1 Comprehension Check

II. Reading for evidence

Do the following statements agree with the claims of the writer in Text B?

YES *if the statement agrees with the claims of the writer*

NO *if the statement contradicts the claims of the writer*

NOT GIVEN *if it is impossible to say what the writer thinks about this*

YES

1. According to Maslow's hierarchy of needs theory, when people achieve one need, they are motivated to fulfill the next level.

NO

2. Even if a person has reached self-actualization, what others think is still important to the individual.

NG

3. The number of people in slums, which are mostly located in Eastern and Southeastern Asia will be increased by 2030.

YES

4. Homesharing is a beneficial choice and has merit for the future.

NO

5. Members of homesharing can share outdoor space and conveniences, which can establish consistent interaction among residents.

NO

6. Ollie was developed for senior citizens in the United States.

Lesson 1 Micro-skills

I. Word Family

II. -ing Form

III. Collocation (2)

Lesson 1 Word Building: word family

A. The following nouns are all used in Text A. Write down other words in the same word family and decide if it is a verb (v.), noun (n.), adjective (adj.) or adverb (adv.). The first one has been given out.

1. hierarchy (n.)	hierarchical (adj.)
2. fulfillment (n.)	<u>fulfill (v.) fulfilled (adj.)</u>
3. approval (n.)	<u>approve (v.)</u>
4. wellness (n.)	<u>well (adj.)</u>
5. accomplishment (n.)	<u>accomplish (v.) accomplished (adj.)</u>
6. residence (n.)	<u>reside (v.) resident (n.)</u>
7. access (n.)	<u>access (v.) accessible (adj.)</u>
8. sustainability (n.)	<u>sustain (v.) sustainable (adj.)</u>
9. maintenance (n.)	<u>maintain (v.)</u>
10. congestion (n.)	<u>congest (v.)</u>

Lesson 1 Word Building: word family

B. Use the words above in Exercise A to complete the following sentences.

1. I know from personal experience that taking time for the self is so vital to personal empowerment and fulfillment.
2. The British Prime Minister's official residence is 10 Downing Street .
3. Increasing employment was an impressive accomplishment .
4. Like most other American companies with a rigid hierarchy , workers and managers had strictly defined duties
5. The plan will be submitted to the committee for official approval .
6. Research shows that relationships, especially friendship and marriage, are key factors of happiness and wellness .
7. The problems of traffic congestion will not disappear in a hurry.

Lesson 1 Word Building: word family

B. Use the words above in Exercise A to complete the following sentences.

8. This thesis reviews in detail practice and effectiveness of the United Nations in the maintenance of international peace and security
9. Experts doubt about the sustainability of the current economic expansion.
10. You need a password to get access to the computer system.

Lesson 1 Word Building: -ing nouns

Some -ing forms can be used as nouns. These nouns often refer to the action or an instance of doing something.

e.g.

Related to this idea is cohousing in which separate homes or apartments are... (verb= cohoused)

Conveniences include furnishings, housekeeping, linen service, gym, Internet service, and... (verb= furnish)

Lesson 1 Word Building: -ing nouns

Some verbs have only an -ing noun form (e.g. cohouse (v.) and cohousing (n.)), whereas other verbs have two nouns with a similar meaning, one of which is an -ing noun.

e.g.

promote (v.) promotion (n.) promoting (n.)

assess (v.) assessment (n.) assessing (n.)

Where two forms of noun are possible, we generally avoid using the -ing noun when it is not followed by a noun.

e.g.

It is a method for assessment. (NOT: it is a method for assessing.)

It is a method for assessing risk./ It is a method for the assessment of risk.

Lesson 1 Word Building: -ing nouns

- A. Complete the table, using a dictionary where necessary to help you. Some verbs only have one noun form.**

Verb	-ing noun	Other derived noun forms
assess	assessing	assessment
analyse	analysing	analysis
apply	applying	application
build	building	
conclude	concluding	conclusion
create	creating	creation
establish	establishing	establishment
fund	funding	fund
invest	investing	investment

Lesson 1 Word Building: -ing nouns

A. Complete the table, using a dictionary where necessary to help you. Some verbs only have one noun form.

plan	planning	plan
remove	removing	removal
obtain	obtaining	
research	researching	research
undertake	undertaking	
identify	identifying	identification
respond	responding	response

Lesson 1 Word Building: -ing nouns

B. Complete the following sentences using a noun form of the verbs in brackets, and adding any other words if necessary. Give alternatives where possible.

1. In this section I will discuss applying / the application of visual aids in teaching.
(apply; teach)
2. He played a fundamental role in establishing / the establishment of the discipline of biomechanics. (establish)
3. When the managerial changes were introduced, we noted the response of employees. (respond)
4. The world wide Web has grown rapidly since its creation in 1991. (create)
5. The programme aims to improve the environment for learning. (learn)
6. The first stage of the project was identifying / the identification of strengths and weaknesses in the company. (identify)
7. We developed a technique for obtaining feedback from students. (obtain)
8. Removing/ The removal of trees from the mountains has led to severe erosion.
(remove)

Lesson 1

Collocation (2)

Collocation is the the combination of words formed when two or more words are often used together in a way that sounds correct.

e.g.

Generally we say “do research” or “carry out research”, not “make research”.

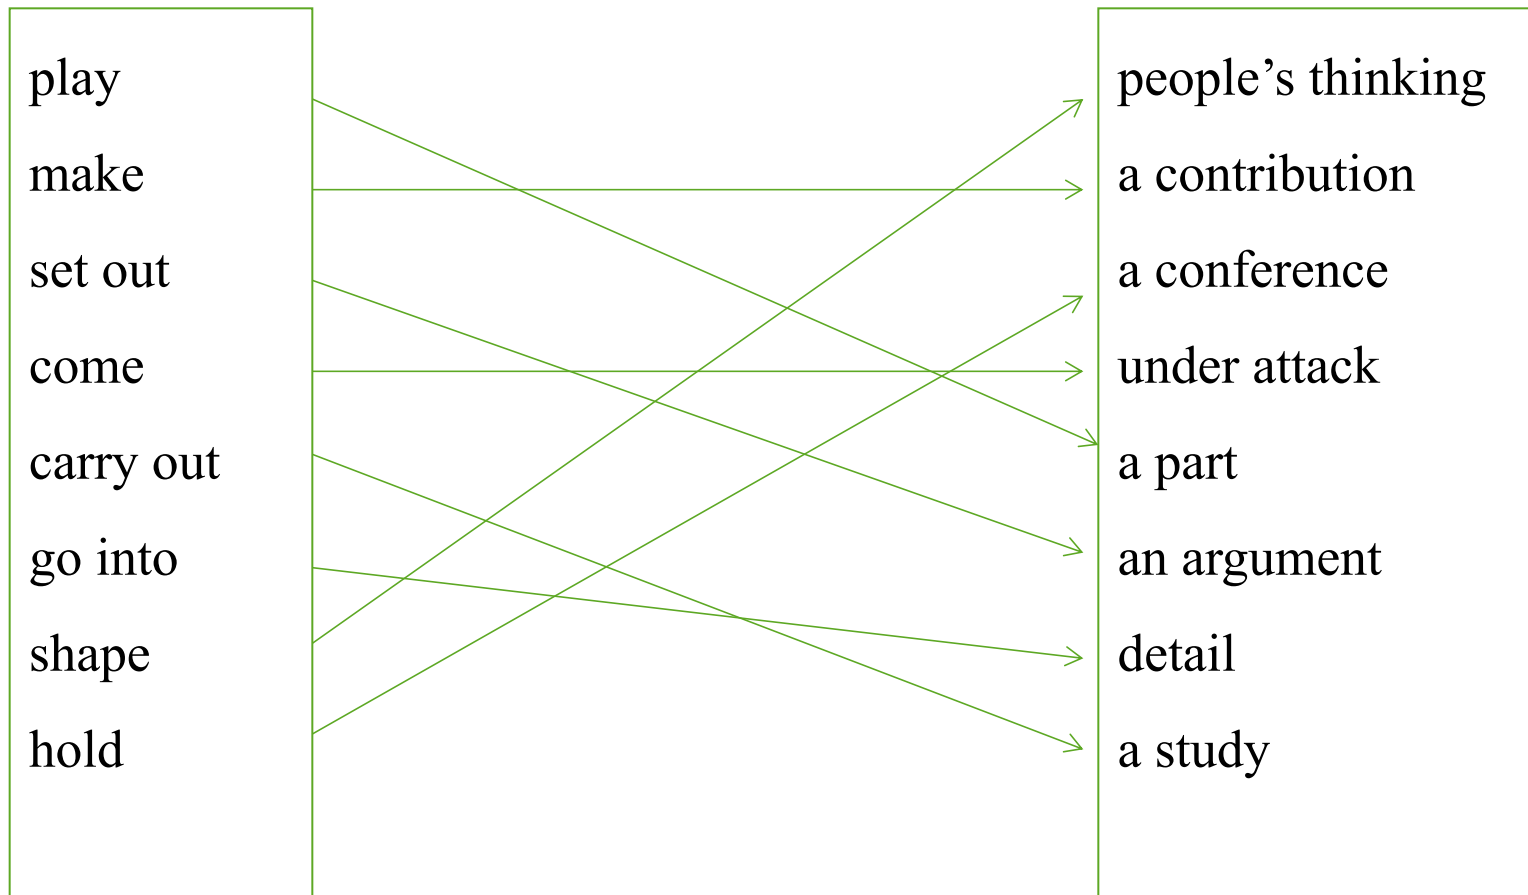

Generally we say “put forward a theory” or “proposes a theory ”, not “gives a theory”.

Lesson 1

Collocation (2)

A. Combine the words in the left box with the words in the right box to form a collocation.

Lesson 1 Collocation (2)

B. Tick the correct words in the following sentences.

1. This paper proposes / presents / offers the case for the complete revision of the theory.
2. Recent research hints / explains / suggests that Jackson's theory of economic development is flawed.
3. The author of the book adopts / adapts / affects an unusual position on the topic.
4. The writer of the article explains / states / declares his opinion very clearly.
5. The article concludes by briefly / shortly / precisely summarising the main points that the author wishes to put across.
6. The writer does / draws / creates some interesting parallels between life now and life in the Middle Ages.
7. I keep / take / hold firmly to my belief in the importance of basic human rights.
8. The book rises / arises / raises some key questions but fails to deal with them in a satisfactory manner.

Lesson 1

Macro-skills

Writing a conclusion

Lesson 1 Writing a conclusion

A conclusion is the last section in your research paper. It is the final viewpoint drawn by the author after investigations, experiments, inferences, discussions, and so on.

Here are some basic elements of a conclusion:

1. You restate your thesis statement: this statement should be rephrased from the thesis you included in your introduction; it should not be identical or too similar to the sentence you originally used.
2. You overview or summarize your major points or main findings and evidence: you should briefly restate points mentioned in your paper.
3. You provide recommendations: you may recommend or suggest a further research study or practical use.

Lesson 1 Writing a conclusion

Note:

The above mentioned is regarded as main elements of a conclusion.

There is a lot of disciplinary variation in this section. For instance, significance (contribution), limitation and implication of the research paper may also be covered. For a particular paper, any one or any combination of these may be appropriate. Some papers don't need a separate concluding section. For instance, conclusion may be covered in the discussion.

Lesson 1

Writing a conclusion

- A. Read the following conclusion section from Text A and identify the basic elements mentioned above.**

The future of housing warrants attention as global population increases, urban cities become more populated, and housing affordability challenges reside in both developed and developing societies. A number of innovative alternatives have been reviewed. Other alternatives exist which might support sustainability and contribute to health.

The basic elements are restatement of the thesis statement, overview of the main points and suggestions.

Lesson 1

Writing a conclusion

- B. Read the following conclusion section from the research paper “*The effect of consumer-based brand equity on firms’ financial performance*” and identify the elements involved.**

In conclusion, the results of this study imply that strong brand equity can cause a significant increase in revenue and a lack of brand equity in hotel firms can damage potential sales flow. That is, if a marketer in hotel firms does not make efforts to improve consumer-based brand equity, then the marketer may expect declining sales and income over time.

Several implications for future research work are suggested by the findings, some of which are in response to the limitations of this study. First, this study did

not investigate a firm’s performance, promotional studies with research

This conclusion involves an overview of major points and suggestions for future research.

such as ROE, ROS and GROA.

the a sales are pure nance

Lesson 2

Lead-in

Answer the following questions

1. There are two words which are similar in spelling, compulsive and impulsive. Figure out the differences of the two words in meaning with a partner.

compulsive: not being able to control their behaviour

impulsive: acting suddenly without thinking carefully about what might happen because of what you are doing

2. Try giving a definition of “compulsive buying disorder” in your own words and compare your definition with the one in Text B.

Open.

3. Discuss with a partner and find out what might be the reasons for compulsive buying disorder.

To fill up feelings of loss by shopping for those who don't work; To boost for self-esteem; To cope with the feeling of anxiety, worry, stress or loneliness.

Lesson 2

Reading

Text B

Compulsive Buying Disorder (Extract)

Abstract

Along with financial consequences, emotional, interpersonal, and occupational problems have occurred as a result of compulsive buying. Following an overview of the history, epidemiology, and characteristics of compulsive buying disorder, this chapter presents a new model for the treatment of compulsive buying disorder, the stopping overshopping model. This comprehensive 12-week experience draws from psychodynamic psychotherapy, cognitive-behavior therapy, dialectical behavior therapy, motivational interviewing, mindfulness, and acceptance and commitment therapy. The chapter concludes with an illustration depicting how to use the model in practice and a brief review of results from a randomized, controlled pilot study of the effectiveness of this model.

Lesson 2

Reading

Para. 1 You can never get enough of what you don't really need. Compulsive buying disorder, which flagrantly illustrates the veracity of this statement, is broadly defined as a maladaptive preoccupation with buying or shopping, characterized by irresistible, intrusive, and / or senseless impulses and behaviors, or results in frequent buying of more than can be afforded, frequent buying of items that are not needed, or shopping for longer periods of time than intended, even in the face of adverse personal, social, and financial consequences (McElroy *et al.*, 1994). Though often referred to as the “smiled-upon addiction” after all, the economy is fueled by overconsumption, compulsive buying disorder is no laughing matter. It can and often does have serious, long-lasting aftershocks. In addition to the obvious financial consequences, emotional, interpersonal, and occupational problems abound, and in extreme cases, incarceration (Hajewski, 2010) and suicide (Roberts and Jones, 2001) have occurred. Despite the fact that compulsive buying disorder has been inching its way farther and farther out of the closet, inspired by

Lesson 2

Reading

television specials, documentaries, and reality TV shows, research interest in this widespread, often addictive disorder is still in its infancy. Compared to its psychological siblings — eating disorders, alcoholism, drug addiction, compulsive gambling, among others — financing of compulsive buying treatment studies is limited.

Para. 2 Compulsive buying was first described by Kraepelin in 1915 and later, in 1924, by Bleuler. After these early mentions, the condition was largely ignored until the late 1980s, when two factors combined to produce an increase in compulsive buying in the USA and an increase in interest among professionals. First, the income disparity between the very poor and the very wealthy in the USA widened during the 1980s and, simultaneously, the proverbial “Joneses” who used to live next door and had a lifestyle not much different from our own, were now being replaced by the “Joneses” who came into our homes through television each night. These “Joneses,” even those we saw on blue-collar sitcoms, were portrayed with an upwardly mobile lifestyle, which ignited our desire for more, bigger, and

Lesson 2

Reading

better mousetraps (Schor, 1998). Over the last 15 years, the proliferation of online shopping and auction sites has made the Internet a fertile environment for the growth of compulsive buying disorder (Dittmar *et al.*, 2007; Lyons and Henderson, 2000; Kukar-Kinney *et al.*, 2009).

Para. 3 Evidence that compulsive buying is a grave and worsening problem is mounting. While compulsive buying is considered a culture-bound syndrome and occurs mostly in cultures that offer “mushrooming credit facilities and boundless buying opportunities,” globalization has extended its reach. Scholarly articles on compulsive buying have been published in Canada (Valence *et al.*, 1988), Mexico (Roberts and Sepulveda, 1999), Brazil (Bernik *et al.*, 1996), England (Dittmar, 2004; Elliott, 1994), France (Lejoyeux *et al.*, 1997, 2007), Germany (Mueller *et al.*, 2008; Scherhorn *et al.*, 1990), India (Jhanjee *et al.*, 2010), Spain (Ruiz-Olivares *et al.*, 2010); Austria (Wolf, 2010), Holland (Otter and Black, 2007), Australia (Kyrios *et al.*, 2004), China (Xiaoqing, 2010), South Africa (Deon, 2011), and South Korea (Kwak *et al.*, 2003).

Lesson 2

Reading

Visitors from over 125 countries have gone to the author's website (www.shopaholicnomore.com), leading one to conclude that compulsive buying is a nearly universal problem.

Para. 4 A large-scale telephone survey of over 2000 randomly selected US households suggested that 5.8% — approximately 17 million Americans — demonstrate symptoms of compulsive buying (Koran, 2006). A later study examined the prevalence of compulsive buying disorder in three narrowly defined subgroups. That study revealed that 8.9% of staff at a southern university, 15.5% of undergraduate students at the same university, and 16% of consumers of an online women's clothing retailer scored in the compulsive buying range (Ridgway *et al.*, 2008).

Para. 5 Compulsive buying affects a diverse and large group of Americans. The “typical” compulsive buyer is a 30-something female who experiences irresistible urges, uncontrollable needs, or mounting tension that can only be relieved by the compulsive buying of clothing, jewelry, shoes, and cosmetics. This “stereotypical” compulsive buyer has generally shown the previously stated characteristics since her

Lesson 2

Reading

late teens or early 20s (Black *et al.*, 1997; Christenson *et al.*, 1994; Scherhorn *et al.*, 1990). However, the spectrum of compulsive buyers is wide, reflecting people who differ from one another on many dimensions, such as age, gender, socioeconomic status, patterns of buying, the intensity of their compulsion, and underlying motivation. Compulsive buyers differ, too, in their patterns of behavior. Some are compulsive daily shoppers, some go on occasional but consequential shopping “binges,” and some collect compulsively. There are image spenders, revenge spenders, bulimic spenders (who need to rid themselves of their money), and codependent spenders (who enable the spending of others). Some buy multiples of each item, some compulsively hunt for bargains; others are compulsive hoarders, and still others engage in ceaseless buy-return cycles.

Para. 6 Compulsive buying can occur in people with any of the different money scripts (Klontz *et al.*, 2008), and it can also be connected to most of the money disorders that have been identified in the financial therapy literature, including compulsive hoarding (Frost and Hartl, 1996; Frost *et al.*, 1998; Frost *et al.*, 2002; Mueller *et al.*, 2007), financial denial, financial enabling, financial dependence, financial enmeshment, and financial infidelity (Klontz *et al.*, 2008). (865 words)

Lesson 2 Critical Thinking

Read the text again and answer the following questions.

1. What are the aftershocks of the compulsive buying disorder?

Financial, emotional, interpersonal, and occupational problems, even incarceration and suicide.

2. What are the two factors contributing to the increase in compulsive buying in the USA in the late 1980s?

The income disparity widened, and “Joneses” came into our homes through television each night.

3. What do you suggest to treat the compulsive buying disorder?

Open.

Lesson 2

Micro-skills

II. Cohesion

Lesson 2 Word building: prefixes in academic writing

A. Which prefix matches each section of the table?

co- inter- multi- out- pre- trans-

1. <u>inter</u> active dependent personal related	4. <u>out</u> break come lying weigh
2. <u>pre</u> _ _ _ _ _ determined existent judge <u>trans</u> war	5. <u>co</u> education exist (-) occur operation <u>multi</u>
3. _____ border formation national plant	6. _____ dimensional disciplinary lateral tasking

Lesson 2 Word building: prefixes in academic writing

B. Replace the underlined part of sentences 1-8 using a word from the above table. Make any changes that are necessary.

1. The study involved a team of **researchers from many different subjects** from across the world. (multi-) *multidisciplinary researchers*
2. She argues that the use of mixed ability pairs has a very positive **effect**. (out-) *outcome*
3. The success of **teaching girls and boys in the same classrooms** in state schools led to its introduction into the private sector. (co-) *co-education*
4. It was felt that the benefits of using a computerised language test would **be greater than** any problems associated with it. (out-) *outweigh*

Lesson 2 Word building: prefixes in academic writing

5. The problems of disease and malnutrition **have an effect on each other**. (inter-) *are interrelated*
6. People tend to **form an opinion of others** from their dress and appearance before hearing what they have to say. (pre-) *prejudge*
7. Rabinovitz (2010) looked at the behaviour of online American college students **doing more than one thing at the same time**. (multi-) *multitasking*
8. Bankoff (1993) has found an association between the establishment of satisfying **relationships with other people** and academic achievement. (inter-) *interpersonal relationships*

Lesson 2 Word building: prefixes in academic writing

C. Complete the sentences by using the words in the box.

interpersonal disorder maladaptive preoccupation

irresistible subgroup uncontrollable codependent

1. If political and ethnic problems are not resolved, the situation could become uncontrollable.
2. The Action Group worked by dividing its tasks among a large number of subgroups.
3. A more telling criticism is that he reduces ethics to interpersonal relationships.
4. If you had a Super parent who didn't allow you to dress yourself, you'll end up as a codependent adult.

Lesson 2 Word building: prefixes in academic writing

interpersonal disorder maladaptive preoccupation

irresistible subgroup uncontrollable codependent

5. It has proved that traditional teaching method is increasingly maladaptive to the demand of social and enterprise development,
6. But over time, particularly when the economy is in fine fettle, to take on debt is a(n) irresistible temptation.
7. Both groups exhibit below-average empathy, rigid attitudes and an atypical preoccupation with themselves.
8. The study found that 20 percent of those infected with the novel coronavirus are diagnosed with a psychiatric disorder within 90 days.

Lesson 2

Cohesion

Cohesion refers to the degree to which sentences or paragraphs are connected to achieve the flow of ideas that is easy to follow. To have good cohesion, you need to know how to use cohesive devices. Cohesive devices are certain grammatical or lexical devices that serve the purpose of connecting two segments of ideas. Grammatical devices include reference, substitution, ellipsis, and conjunction, while lexical devices include reiteration and collocation.

Lesson 2

Cohesion

- A. The following methods a-f show the main ways of achieving cohesion. Read statements 1-7 and match them with the descriptions a-f.**
- a. **Reference** refers to words pointing to other words or concepts that have already appeared or are about to appear in the text. Usually, pronouns serve this purpose.
 - b. **Substitution** refers to the use of a word / phrase to replace another one used earlier. For example, “the one(s)” and “the same” are often used to replace nouns and various forms of “do” are used to replace verbs. Sometimes “so” can be used to replace a phrase or a whole clause.
 - c. **Ellipsis** is the omission of words. It is used when the omitted words are understood from the context.
 - d. **Conjunction** refers to the use of transitional words or phrases that link pieces of ideas together. These kinds of words and phrases are also called discourse markers. They serve as signposts to indicate to the readers the order and flow of ideas in your writing.

Lesson 2

Cohesion

- A.** The following methods a-f show the main ways of achieving cohesion. Read statements 1-7 and match them with the descriptions a-f.
- e. **Reiteration** refers to the use of repetition (the same word), synonymy, antonymy, or hyponymy. A famous example of repetition is the use of “I have a dream” in Martin Luther King, Jr.’s speech. To prevent from becoming dull, synonymy, antonymy, or hyponymy are often used.
- f. **Collocation** refers to a sequence of two or more words that regularly go together.

Lesson 2

Cohesion

A. The following methods a-f show the main ways of achieving cohesion. Read statements 1-7 and match them with the descriptions a-f.

(**e**) 1. The pinnacle of the needs hierarchy is self-actualization, which is a feeling of accomplishment. When a person has reached self-actualization, what others think is less important to the individual.

(**d**) 2. To obtain quality and affordable housing is a daunting task for the world's population. However, given innovative solutions and principles of sustainability, this is the appropriate time to consider the role of housing in the future.

() 3. The project entitled “ensemble2générations” has paired more than 6,000 students with older people in the country (ensemble2générations, 2018). One such pair involved a student from Argentina sharing a home with a 76-year-old Parisian.

() 4. At present, over half of the world's population, which amounts to 3.5 billion people, lives in urban cities. This is expected to increase to 5 billion people by 2030.

Lesson 2

Cohesion

A. The following methods a-f show the main ways of achieving cohesion. Read statements 1-7 and match them with the descriptions a-f.

(**d;e**) 5. The 11th goal, Sustainable Cities and Communities, has the objective of “making cities and human settlements inclusive, safe, resilient, and sustainable” (United Nations, 2018b). While urban areas provide cultural opportunities, market development, productivity, societal advances, and more, several challenges exist in the areas of maintenance of resources and supportive infrastructure. Housing shortages, funding for essential services, and congestion are paramount.

(**d;c**) 6. Compulsive buying was first described by Kraepelin in 1915 and later, in 1924, by Bleuler.

(**a;d;e;f**) 7. Compulsive buying can occur in people with any of the different money scripts (Klontz *et al.*, 2008), and it can also be connected to most of the money disorders that have been identified in the financial therapy literature, including compulsive hoarding (Frost and Hartl, 1996; Frost *et al.*, 1998; Frost *et al.*, 2002; Mueller *et al.*, 2007), financial denial, financial enabling, financial dependence, financial enmeshment, and financial infidelity (Klontz *et al.*, 2008).

Lesson 2

Cohesion

- B.** The table below shows some of the commonest conjunctions and their functions. Read the texts in the previous units and find more examples of conjunctions.

Type of link	Conjunctions
Comparison and contrast	similarly but in contrast on the other hand ...
Cause and effect	as a result consequently hence therefore ...
Addition	moreover apart from furthermore another not only ... but also ...
Condition	in that case alternatively ...

Lesson 2

Cohesion

B. The table below shows some of the commonest conjunctions and their functions. Read the texts in the previous units and find more examples of conjunctions.

Time order / Listing	firstly afterwards last but not the least ...
Exemplification	for example / instance take ... as an example ...
Highlighting	in particular ...
Transition to a new point	with regard to as far as ... is concerned ...
Summarizing	in conclusion ...

Lesson 2

Cohesion

Complete the following paragraph with the conjunctions in the table.

firstly	in conclusion	another
not only... but also...	therefore	for example / instance

Gold, a precious metal, is prized for two important characteristics.

1 Firstly, gold has a lustrous beauty that is resistant to corrosion.

2 Therefore, it is suitable for jewelry, coins and ornamental purposes.

Gold never needs to be polished and will remain beautiful forever.

3 For example / instance, a Macedonian coin remains as untarnished today as the day it was minted twenty-three centuries ago.

4 Another important characteristic of gold is its usefulness to industry and science.

For many years, it has been used in hundreds of industrial applications.

The most recent use of gold is in astronauts' suits. Astronauts wear gold plated heat shields for protection outside the spaceship.

5 In conclusion, gold is treasured 6 not only for its beauty, but also for its utility.

Lesson 2

Writing an abstract

An **abstract** (sometimes referred to as a synopsis) is a brief summary of a book, a thesis, a journal article or a conference article. The linguist Ken Hyland (2000) has identified five “moves” to describe the structure of research abstracts.

- Move 1 Introduction

Establishes context of the paper and motivates the research.

- Move 2 Purpose

Indicates purpose, thesis or hypothesis, and outlines the intention behind the paper

- Move 3 Methods

Provides information on design, procedures, assumptions, approach, data, etc.

Lesson 2

Writing an abstract

- Move 4 Product (Now often referred to as Results)
States main findings or results, the argument, or what was accomplished.
 - Move 5 Conclusion
Interprets or extends results beyond the scope of the paper, draws inferences, points to implications, or wider applications.
- Note:** Although all five moves rarely occur in a single abstract, the combination of moves and their ordering depend on the exact field of study and type of research.

Lesson 2

Macro-skills

Writing an abstract

Lesson 2

Writing an abstract

- A. Read and complete the following interpretation of an abstract by choosing the appropriate words in the brackets.**

The abstract is usually placed 1 _____ (before / after) the introduction of a paper, but it is usually the 2 _____ (first / last) part of the paper to be written. All other sections of the paper should have been completed before the essential information can be selected and summarized. The abstract is a 3 _____ (condensed / revised) version of a research paper that 4 _____ (highlights / elaborates on) the major points covered and provides readers with a brief 5 _____ (preview / review) of the content and scope of the writing. It is formal and impersonal.

Lesson 2

Writing an abstract

A. Read and complete the following interpretation of an abstract by choosing the appropriate words in the brackets.

An effective abstract usually:

1. uses one or more well developed paragraphs: these are unified, coherent, concise, and able to stand alone;
2. uses an introduction / body / conclusion structure which presents the article, paper, or reports purpose, results, conclusions, and recommendations in that order;
3. follows strictly the 6 _____ (chronology / analogy) of the article, paper, or report;
4. provides 7 _____ (flexible / logical) connections (or transitions) between the information included;
5. adds 8 _____ (much / no) new information, but simply summarizes the report;
6. is understandable to a 9 _____ (narrow / wide) audience;
7. oftentimes uses passive verbs to 10 _____ (downplay / profile) the author and emphasize the information.

Lesson 2

Writing an abstract

B. Reorder the sentences below to work out a short Abstract.

1. Our study was confined to the disciplines of physics, life sciences and medicine, where we found a significant increase from 50% to more than 200% in the number of articles with question mark titles.
2. We examined nearly 20 million scientific articles and recorded the development of articles with a question mark at the end of their titles over the last 40 years.
3. We looked at the principle functions and structure of the titles of scientific papers, and we assume that marketing aspects are one of the decisive factors behind the growing usage of question-mark titles in scientific articles.
4. The titles of scientific articles have a special significance.

Lesson 2

Writing an abstract

C. The following is a sample Abstract. Identify the key elements included.

implications

limitations

methodology

originality/value

results

purpose of the paper

Abstract

The purpose of this paper is to establish the importance and approaches in securing an organization's legitimacy from the network community of customers, suppliers and manufacturers, including private investors and state-owned institutions when marketing their products.

The paper presents an inductive interpretative approach complimented by action-based research founded on inquiry and testing.

The paper finds that the key to legitimacy success involves using legitimacy orientations to demonstrate commitment to the interests of constituents, acquiring legitimacy from them, but concurrently considering the central government's influence on a firm's legitimacy performance.

The multiple interactions proposed in this paper remain untested and might have to be modified pending further empirical testing and analysis.

In China's telecommunication market, a company's legitimacy emanates first and foremost from the development and commercialization of innovative and creative technological solutions. This requires good, creative management of technological resource and activity links, connecting the company's technology to network constituents which include local manufacturers, carriers, software developers, and investors.

This is the first published paper that examines the proposed interactions among legitimacy orientations, alignments, and performances from a "market-as-network" perspective in a dynamic, transitional Chinese telecommunication market.

Abstract

The purpose of this paper is to establish the importance and approaches in securing an organization's legitimacy from the network community of customers, suppliers and manufacturers, including private investors and state-owned institutions when marketing their products.

The paper presents an inductive interpretative approach complimented by action-based research founded on inquiry and testing.

The paper finds that the key to legitimacy success involves using legitimacy orientations to demonstrate commitment to the interests of constituents, acquiring legitimacy from them, but concurrently considering the central government's influence on a firm's legitimacy performance.

The multiple interactions proposed in this paper remain untested and might have to be modified pending further empirical testing and analysis.

In China's telecommunication market, a company's legitimacy emanates first and foremost from the development and commercialization of innovative and creative technological solutions. This requires good, creative management of technological resource and activity links, connecting the company's technology to network constituents which include local manufacturers, carriers, software developers, and investors.

This is the first published paper that examines the proposed interactions among legitimacy orientations, alignments, and performances from a "market-as-network" perspective in a dynamic, transitional Chinese telecommunication market.
